

安装

2017年3月16日 晴 04:00

Centos

```
[root@rancher-server ~]# yum install yum-utils -y
[root@rancher-server ~]# yum-config-manager --add-repo https://download.docker.com/linux/centos/docker-ce.repo
[root@rancher-server ~]# yum makecache fast
[root@rancher-server ~]# yum install docker-ce -y
[root@rancher-server ~]# systemctl start docker
[root@rancher-server ~]# systemctl enable docker
[root@rancher-server ~]# docker run hello-world
```

```
[root@rancher-server ~]# tee /etc/docker/daemon.json <<- EOF
{
  "registry-mirrors": [https://ld7jqf2j.mirror.aliyuncs.com]
}
EOF
```

```
[root@rancher-server ~]# systemctl daemon-reload
[root@rancher-server ~]# systemctl restart docker
```

Ubuntu
